FLORIYNCOIN

Bye The People For The People

Introduction

What is still missing in today's World of Digital Currencies?

Globally there are at present 7,812 Cryptocurrencies / Tokens and 1000 Blockchain with at least four types of Blockchain networks. All these coins and tokens are related to projects of their own, to assure payment. Today payments with fiat and digital currencies are expensive, slow, not universal, and in the case of digital currencies pending the setup of the Blockchain even not fully secured.

What if there would be a coin that creates an efficient payment globally for all currencies?

This coin needs to be cheap, fast, secure, and with its own ecosystem. A coin to convert to and arrange all your payments, so project coins, value coins, and stablecoins can be used for their main goal. People and businesses that are willing to pay with for example BTC – transfer BTC to Florijncoin, arrange their payment, and or if they like to fund from Fiat to any other coin, they transfer fiat to Florijncoin and Swap to the currency they like. We have developed and created this missing link. The world's most efficient transporter is ready to go live.

Everyone across the globe will be able to purchase goods and services easy fast, cheaply, and securely. You can convert to Florijncoin any moment any time with your mobile.

In 2021 there were approximately 300 MLN Crypto-users worldwide and this is out to grow to 1 bln users end of 2022 according to Yahoo finance. Global acceptance by governments and accepting Bitcoin as legal tender is debit to the increasing usage and acceptance of digital currencies. Once these users can buy and sell anything they would like with their assets – a fast adoption can be accounted for. Marketing and info if course essential to make FLRN known. FLRN will also create business for the existing coins assuring a sustainable and affordable fast payment system. FLRN is out to generate growth for all cryptocurrencies and offer all people and businesses fast and easy payments. With FLRN there are no barriers to expanding digital assets and a need for coins to be able to assure fast payment transactions. FLRN is there. As Europe, USA and China are converting towards digital Central Bank Digital Currencies, FLRN is the bridge to all worlds. Payments CBDCs can be swapped to FLRN and FLRN to any Crypto and visa versa. For payment transactions, FLRN is the coin.

We have one of the world's best Mathematicians developing a source code. Soon we do expect to enable 30 million transactions per second. WORLD'S most efficient transaction coin for payments is ready to go live. Florijncoin is known in the market by its coin market cap ticker FLRN. FLRN is a global payment system built on an innovated and secure X11 Blockchain. This coin enables you to send money globally for 1 cent within 1/10 of a second anywhere in the world. This way FLRN is saving Billions and Billions of costs and gaining trust and offering easy access to payable services. Florijncoin is having its own Blockchain.

[\(https://www.florijncoin.com/block-explorer-2/\)](https://www.florijncoin.com/block-explorer-2/).

By having its own Blockchain next Florijncoin can facilitate other services that require velocity and secure transitional processing. Like NFT's or Smart contracts. Florijncoin can also hardfork its own system for new coins. Florijncoin is out to provide licenses to partners that can utilize the complete X11 ecosystem, with a website, mining pool and masternodes, and block explorer, and building next-generation blockchain solutions.

In realizing per direct a global reach fast we partnered with the mobile and cold wallet of ELLIPAL (see App Store). By having access to FLRN in the ELLIPAL wallet all coins are easy to hold and to be utilized for payments whenever you like to do so. In the ELLIPAL any coin can convert to FLRN to execute its payments. A true and great value in the current landscape of coins. www.ellipal.com

FLORIYNCOIN

Bye The People For The People

FLRN's Blockchain algorithm is unique and assures superfast global peer-to-peer payments on a distributed ledger, with a total circulation of 640 million FLRN aims to give the user power back over his or her assets and no longer must depend on slow and expensive intermediaries or agencies. Technically, it is a fork of X11 of Dash, in the same sense that a knife is a fork of a spoon. FLRN is only a payment coin and we did not do an ICO and developed it with our company investment. We developed the whole (de)centralized application.

Our goals and founding objective

Florijncoin does not compete with other cryptocurrencies but rather we strive to provide solutions and support to users of all currencies and Blockchains. No more painful processes. FLRN is made by the People for the People.

FLORIYNCOIN ticker FLRN is a decentralized cryptocurrency, established in November 2018. Our objective from the start, becoming a leading payment medium in tomorrow's cashless society. FLRN stresses the importance of fair distribution, long-term stability, and ease of use. Its flagship product FLORIYNPAY will permit instant crypto-to-fiat mobile payments using wallet-to-wallet payments with a free-to-download mobile wallet in the Apple or Google Play Store. It's a self-funded project that endorses a participatory approach to the development and strategic direction through its decentralized governance system. It is supported by an international team from diverse professional backgrounds such as software engineering, product development, finance, and marketing.

Our goal is to have a seamless, fast, stable, and safe Blockchain that provides consumers and businesses unrivaled transaction processing, value, and tailored services.

What lies under the hood?

FLORIYNCOIN IS built and is today WORLD'S most efficient transaction coin for payments. Florijncoin is known in the market by its coin market cap ticker FLRN. FLRN is a global payment system built on an innovated and secure X11 Blockchain. This coin enables you to send money globally for 1 cent within 1/10 of a second anywhere in the world. This way FLRN is saving Billions and Billions of costs and gaining trust and offering easy access to payable services. Florijncoin is having its own Blockchain. (<https://www.florijncoin.com/block-explorer-2/>). By having its own Blockchain next Florijncoin can facilitate other services that require velocity and secure transitional processing. Like NFT's or Smart contracts. Florijncoin can also hard fork their own system for new coins to build and provide licenses to partners to use the complete X11 ecosystem, with the website, mining pool and masternodes, and block explorer.

To assure direct global reach fast we partnered with the mobile and cold wallet of ELLIPAL (see App Store). By having access to FLRN in the ELLIPAL wallet all coins are easy to hold and to be utilized for payments whenever you like to do so. In the ELLIPAL any coin can convert to FLRN to execute its payments. A true and great value in the current landscape of coins. www.ellipal.com

FLRN is technical and organizational ready to go public on some (CMC) coin market cap listed exchanges. Florijncoin is invited to list on several cryptocurrency exchanges.

FLORIYNCOIN

Bye The People For The People

Ecosystem

A lot of good people have hopes of one day, paying with a fast, secure, peer-to-peer payment coin built by people for all the people. Florijncoin works via a digital and decentralized X11 algorithm blockchain network and therefore has no single point of failure. The Florijncoin X11 algorithm ASIC mineable blockchain uses the X11 algorithm with ASIC miners, which was once designed by Dash's lead developer, Evan Duffield. We can say that Florijncoin is a "fork" of Bitcoin and Dash, and our Florijncoin | FLRN development team has developed this fork in a better way and made it a superfast peer-to-peer technology payment coin. Our Various functions such as; safety, super speed, and the best reliability have been preserved from the original Dash blockchain but improved with a network of masternodes, that validates our blockchain 24/7 security against a 51% attack.

Target group

Florijncoin is a cryptocurrency for superfast and will therefore focus globally on payments for all consumers and entrepreneurs. The Florijncoin platform is very user-friendly, allowing everyone from young to old to use this new and safe method for payment, and saving. The Florijncoin | FLRN will be introduced for 1 euro when listed on the first regulated CMC exchange, but nobody can claim any price rights, because only the market will decide when listed at the exchanges what the market value will be, on the exchanges Florijncoin | FLRN will get its real value by supply and demand to reside by all users, buyers, and sellers. Its blockchain is only made as a superfast payment and savings coin.

Laws and regulations

Regarding laws and regulations, Florijncoin adheres to all regulations where Florijncoin will be active unless it is not in line with Florijncoin policy. In case the latter occurs Florijncoin is to decide to change her policy specifically for this area. The trading of FLRN is executed at regulated exchanges where Florijncoin is listed. These exchanges are Coin Market Cap regulated exchanges or Coin Paprika and or Coin Gecko, to provide all people at ease access to FLRN, wherever you are. At these exchanges, you can find the real daily value of all cryptocurrencies.

Operation of the Florijncoin network

Florijncoin uses the "Proof of Work" system in combination with core protected masternodes. This allows the Florijncoin cryptographic X11 ASIC minable blockchain network to reach an agreement on the status of all transactions recorded on the blockchain and to prevent certain attacks on the network. The additional introduction of master nodes also makes a 51% attack virtually impossible, making the Florijncoin network safe and reliable even with a lower hash rate. In case of a breach, all damage and costs will be recovered by the fraudulent party. Florijncoin shall always report any digital break-in to the equipped legal authorities, such as the police, and all other relevant authorities. The damage includes direct costs like development costs and damage to the blockchain, but also all indirect costs that impact all users and relationships of Florijncoin and affect our growth and stability.

FLORIYNCOIN

Bye The People For The People

FlorijnPay

FlorijnPay is a Florijncoin project to bring entrepreneurs and customers together through payments via the blockchain. Florijncoin is developing a POS system that the entrepreneur can implement in his or her case and in this way can easily serve customers with payments in Florijncoin and other cryptocurrencies. This method of payment is practically free, super-fast, secure, and without the intervention of a bank or other agency. Florijncoin has found a great partner for saving secure mobile wallets, cold wallets, letterbox, and POS (point of sale) named ELLIPAL – www.ellipal.com. For our solution, we do have some great international business partners in building smart solutions.

Vision

Together with the European and global community, we hope to achieve better financial services for all consumers and entrepreneurs within Europe and even globally. One that is fair, transparent, and cheaper than traditional financial services and where the power over the assets lies entirely with the end-user. We are aware that this may be a long and arduous process, but we are convinced that the transition to cryptocurrency will take place and Florijncoin will play an important role in this for the European market. Cryptocurrency is indispensable in today's society and contributes to a stable financial system and is made available and accessible to all the people. The role of the traditional fiat currency is outperformed by the blockchain technology with Crypto and CBDCs. The question is not whether a cryptocurrency and or a sovereign CBDC is to take over the role of FIAT currencies, but when. Within this system, there is always a need for a transporter. The coin that is handling all your transactions and payments. Florijncoin is this transporter. FLRN is the link towards any global payment to be made. Handling converts from any Crypto or converts to CBDCs to assure your payments will go secure, fast, and smoothly at low to almost no cost. Low (no) cost and speed are the essential ingredients in remaining the leading transport coin in the world. Florijncoin has the team and technology to stay there.

Think of Florijncoin | FLRN as a fair global currency for all the people in the world, built by people for people. Everywhere. This is a real main-net X11 algorithm ASIC mineable blockchain project that will be constantly evolving. And that begins with undoing the damage done by scammers, schemers, and bad actors. You may have some questions. On our website is a contact form to ask us your questions.

Cryptocurrency exchanges

Until cryptocurrency becomes the new standard, it is important to be able to continue to do business with instances that are not yet ready. For this, it must be possible to exchange Florijncoin | FLRN for another coin or even fiat. This is facilitated by third-party cryptocurrency exchanges. The Florijncoin team is trying to get FLRN on the best exchanges to ensure that this opportunity is rolled out globally in the best possible way. In case you can make a difference you are invited to contribute and become a partner in World's game-changing payment solution.

FLORIYNCOIN

Bye The People For The People

IMPORTANT NOTE:

- ✓ Buying Florijncoin | FLRN before it's listed at the third-party exchanges is 100% your own risk, you can invest to help us grow our Blockchain and team and make it possible that we can find the right partners. Mining: You can mine Florijncoin | FLRN with an X11 miner or stake them with a master node with 10.000 FLRN. But remember there is at this moment, not a real exchangeable value until Florijncoin | FLRN is listed on the third-party exchanges, to buy, sell, or trade them there.
- ✓ Buying a new cryptocurrency like Florijncoin | FLRN that is not yet on a third-party exchange is a high buyer's risk. Cryptocurrency can rise in price or decrease in price when listed on an exchange by supply and demand. Pool and Block Explore Florijncoin | FLRN is minable with an ASIC X11 algorithm miner on the Florijncoin | FLRN mining pool via after contacting and doing a KYV at our pool master email: vvlien@ecrypty.com see Google for all miners lie Bitmain D3, StrongU, Spondoolies, Ibelink, Innosilicum, and all transactions can be tracked on the Florijncoin | FLRN Block Explorer see: <http://inspector.flrn.pro:8080/>
- ✓ Important Until Florijncoin | FLRN is listed at the third party the value of Florijncoin is ZERO or €0,- because only listed at the third-party Coin Market Cap (CMC) exchanges it will. Our development team will never buy the coins back, so when you win or get them for marketing sharing or mine them on the mining pool or with a master node you can only hold them until listed and they get a real market value by supply and demand on the third-party Coin Market Cap (CMC) exchanges, Cryptocurrency Investing can have a place in your portfolio, but only after you have done your proper homework and evaluated the benefits and all the risks that you want to take by buying crypto. Here are some of the pros and cons of adding cryptocurrency to your investment portfolio. Adding cryptocurrency to an investment portfolio aids diversification in several ways.

Historical pattern coins and tokens

In the past, the value of Bitcoin, Ethereum, Litecoin, and other popular cryptocurrencies tended to rise when stocks were falling. If that trend continues, cryptocurrency could be a hedge in the next bear market. The sheer number of cryptocurrencies also provides diversification, another important consideration for investors. Instead of investing a large chunk of money in a single cryptocurrency, investors can spread the risk around by taking small positions in a wide variety of virtual forms of payment. Cryptocurrency investments are not like stocks, bonds, and mutual funds, and the security situation is one potential disadvantage.

New investors are often surprised to learn that they could see their holdings disappear if hackers gain access to their accounts, and unlike other investments, there is typically no way to get the money back. Always be safe and use a cold wallet like the Ellipal cold wallet. For more information contact development info@florijncoin.com.

The lack of security is a major concern for cryptocurrency investors, and there are only so many ways to hedge those risks. Some cryptocurrency investors choose to hold their coins in so-called cold storage, isolating their investments from the internet and the associated risks. But if those investors lose the access keys, their virtual coins are probably gone forever. Investors need to be aware of, and be prepared for, the unique security risks of the cryptocurrency market. In addition to the risk of forming a bubble, the regulators, also point out other risks when investing in virtual currencies:

The virtual currency currently falls outside the supervision of the regulators. The rates of virtual currencies can fluctuate dozens or even hundreds of percent per day. In addition, there is a real risk that the value of a virtual currency may permanently fall to zero, and then you have lost your money. Virtual currencies are vulnerable to

FLORIYNCOIN

Bye The People For The People

cybercrime. Others may get access to your wallet through a hack, which means you can lose your virtual currency. If you lose the password from your digital wallet, it is no longer accessible in any way. This means that you have lost your investment forever. Many virtual currencies have little trade. This makes them vulnerable to price manipulation, for example by artificially inflating the price. The large increase in popularity can attract providers with fraudulent intentions. For example, you can become a victim of a pyramid scheme with virtual currency. This allows you to lose your invested money. Be careful in executing transactions, and we recommend using always Coin Market Cap listed solutions. In case of building a Crypto investment portfolio spread your risk, be informed, and do not invest with funds you can not miss.

Regulations and Florijncoin

Because of governmental regulations, Florijncoin | FLRN will only be sold when listed at the third-party Coin Market Cap (CMC) exchanges where Florijncoin also will get its official value by supply and demand. The Dutch AFM advises consumers who want to invest in virtual currencies to immerse themselves well in the product. Be aware of the risks and costs, spread your investments, and never invest more money than you can miss it. The Dutch AFM is committed to fair and transparent financial markets. As independent supervisory supervisors, we contribute to sustainable financial well-being. All content set out within this website, the white paper and other related documents are subject to change.

More information about investing can be found on the Florijncoin | FLRN website, see our Florijncoin | FLRN Disclaimer: <https://www.florijncoin.com/disclaimer> .

Security

At Florijncoin, the power of the assets lies entirely with the end-user. This also means that the responsibility for this lies with the end-user. We as Florijncoin ought see it as our duty to provide guidance / free advice in opting for a secure third-party wallet provider. Online wallets and exchanges are not the best way to store Florijncoin in the context of security, Florijncoin offers various options to safeguard its assets: saving Florijncoin in a mobile wallet for daily use and storing your excess value of Florijncoin and other valuable Crypto assets on an "Ellipal cold wallet". You can transfer at any time your coins from the cold wallet (offline) to the (online) mobile wallet.

The "Ellipal cold wallet" www.ellipal.com offers to our knowledge at the moment a leading-edge secure wallet. For more info, you can download the mobile Ellipal wallet in the Apple or Google Play Store. Simply use search and type in "ELLIPAL".

Florijncoin adheres to a stringent security policy to protect our community. Therefore, we used the latest intelligence to protect our coin and Blockchain core. By applying our high standard, we do make a 51% attack or double confirmation impossible. Furthermore, our governance is continuously changing and validated by our master nodes. This way no bad actors can collude to break the system. To protect our mining pool we adapted a specific (KYC) for our miners. We named this procedure KYM (Know Your Miner). This way we secure our mining pool as we do know our Florijncoin miners. When someone breaches our security with data hacking, we will always report this crime to the local authority and private agencies.

Avoid Scams! Never give out your wallet passphrase for any reason! Be very suspicious of all URLs, emails, forms, and direct messages we have <https://www.florijncoin.com> and info@florijncoin.com, and support@florijncoin.com . If someone claims to be from "support" they are trying to scam you. If someone claims, you need to "validate" that they are trying to scam you. Always be on your guard and do a cross-check.

FLORIYNCOIN

Bye The People For The People

Disclaimer

Florijncoin which is stored in your Florijncoin wallet is solely and entirely under your own responsibility, you manage your own “wallet” and “private” keys and take care of it. The Florijncoin team cannot be held liable and cannot help you to repair your wallet if you delete, reconfigure, and or lose it.

Always ensure safe storage. Our advice in this is an Ellipal cold wallet see IOS and ANDROID App in the Apple or Google Play store, but also a titanium letterbox for the storage of your private keys.

#notyourkeysnotyourcrypto

Tax and Competent authorities there is a real risk in the cryptocurrency market, including the dangers posed by future taxation and additional regulation. The tax agencies have already taken notice and the tax agencies are going after large holders of Bitcoin and other popular cryptocurrencies. Investors who think they can fly under the radar and enjoy anonymity in their cryptocurrency holdings could be in for a rude awakening. If you plan to play in this arena, you should be prepared to pay up in the form of taxes. The risk of additional regulation is another potential headwind in the cryptocurrency market and one that all investors should be prepared for. Several countries have already introduced significant trading restrictions and other regulations, and those existing rules could be just the tip of the iceberg. If additional regulation comes to pass, the attractiveness of cryptocurrency investments could diminish greatly. There is more to investing than just stocks and bonds and adding other asset classes to your portfolio could have some significant advantages.

Even so, cryptocurrency investments are not for the faint of heart, and newcomers may want to read carefully our website and whitepaper. We strongly recommend in doing research before investing and or utilizing new solutions.

We are in case of abuse or fraud obligated to hand over your data to the competent authorities in the event of fraud and/or in the event of an investigation by the police, judicial authorities, or tax authorities, etc. We will also be obliged to always report all illegal activities, such as offering us” nonidentifiable funds”, to the relevant authorities. Security and better financial services are what we stand for. Florijncoin | FLRN is only for sale at a regulated CMC exchange that will also do the KYC & AML check-up, you are only allowed to buy a maximum that is given to you by the relevant exchange(s). Florijncoin | FLRN is privately financed and developed by FLRN Ventures LTD located in London (United Kingdom) City Road/60 EC1V 2NX London United Kingdom.

Florijncoin | FLRN Community

In developing the ultimate coin for your independence – you do have a choice now. We invite holders of existing crypto and people out to use Florijncoin for all their transactions. All united Florijncoin | FLRN users are the army of peace creating a new future for all generations. You and all fellow holders, admins, mods, developers, miners, master node owners, all leaders, and all social media influencers, meme makers, chillers, are the friend of Florijncoin and part of embracing change for the better of our world.

We as Florijncoin team do thank you for having the guts to join us. You altogether are the real Florijncoin community, and we salute you all. Join us we are open for everyone and everywhere on the globe.

Find on the next page a summary of the basic characteristics of our blockchain.
